OARC Message from our Leaders

Craig's Corner - A Message from our President

By Craig Howe W0VRM

Craig's Corner June 2026

Hello ham family,

We enjoyed a great event with the Golden Spike again this year. The Rangers always look forward to having us come out and help them celebrate their anniversary.

Tracy Hess, KK7ZAG our Activity Director, again organized and arranged this great annual event for us. We appreciate his efforts to facilitate and represent us.

We logged 167 contacts, many of which were POTA and some were Park-to-Park. We sincerely appreciate all of the help setting up, operating throughout the day, and taking down.

Coming up on June 27 and 28 is Field Day!! We have a new location behind Marriott Slaterville City Hall at 1570 W 400 N.

Set up will begin at 9:00 am with operating officially from noon Saturday until noon Sunday (of course noon Eastern Time comes early). We appreciate all helpers with setup and take down.

Field Day is a great opportunity to invite friends, neighbors, and officials to come and see what radio is all about.

This July our fox hunt will occur on the 2nd Saturday, July 11, 2026. Stay posted for more details. The basic information is that we will start at 8:30 am. The transmitter will be located in Weber County and if you find it you will have breakfast waiting. We are going to offer a \$100 prize for the first successful person to discover the transmitter as we did last year.

The Club is anticipating significant leadership changes in August for our Elections.

All of our club officers hold a term of one year and each office needs to be refreshed, year by year.

So far this year, we only have received confirmation of one candidate for the Treasurer's office. Mike Fulmer KZ70, has agreed to assist Jay Siddle KG7CJN, and transition into the Treasurer's responsibilities as well as run for the office in August.

This is the only club office that currently has a candidate announced to Colleen Pike KJ7EAY, our election chair, for this election cycle.

I have a pending assignment that will not allow me to continue serving as the OARC president after August 2026. I love this club and our members who help and serve each other so generously. I look forward to new leadership taking us into our next 100 years.

Please consider your potential to provide leadership for us in August and support Colleen in her role as she is seeking to fill the candidate roster as quickly as possible.

In addition to the Club Officers, there are several volunteer opportunities to serve. Val Campbell, who has held the club together for over 20 years, has also asked for assistance with several areas that he has been supporting all along. There have been a couple members who have reached out to Val and we are truly appreciative.

The heart of our club is each individual member and this is what makes the club attractive to others and to us as a group. The structure of the club is the part where members choose to help set the tone, provide guidance for activities, and ensure that the Locations, Financial, Legal, and presentations are prepared and take place smoothly to be available to club members.

As I said last month, it has been an honor to represent the Ogden Amateur Radio Club during these last 3 terms as your President. Every one of us represents our club in normal everyday ways as others watch how we interact and serve the community both as official club members and as plain folks with antennas on our vehicles.

As always, my very best to each of you!!

73,

Craig W0VRM

Craigshowe@gmail.com

GUEST CONTRIBUTION

By Rick Hansen N7EGA

What made spark transmitters appealing for use on ships until 1966, despite their known drawbacks?

Banned worldwide in the 1920s for jamming radio traffic, spark-gap transmitters were legally kept on ships until 1966. Seafarers clung to this obsolete tech for one life-saving reason. A spark transmitter generates radio waves precisely as the name suggests: by creating a high-voltage electrical spark across a physical gap. This violent discharge creates a jagged, unrefined radio signal. For everyday communications, this was a massive drawback because a single spark transmitter would bleed over into neighboring frequencies, effectively jamming other radio traffic. However, in a life-or-death scenario on the open ocean, that major flaw became a life-saving feature.

Here is why ships kept them around as mandatory emergency backups:

Broadband broadcasting: If a ship was sinking, the radio operator wanted everyone to hear the SOS. Because the spark transmitter blasted energy across a wide swath of the radio spectrum, nearby ships did not need to be tuned perfectly to the 500 kHz international distress frequency to hear the call. The sheer bandwidth of the signal ensured it would break through on multiple channels, demanding the attention of any radio operator in the vicinity.

Extreme durability: The technology that replaced spark transmitters relied on delicate glass vacuum tubes. On a ship battling heavy seas, extreme vibrations, or taking on water, fragile glass tubes could easily shatter. A spark transmitter, by contrast, was practically indestructible. It consisted primarily of heavy wire coils, rugged capacitors, and a physical gap. There was very little that could break.

Simple power requirements: When a ship loses its main engines and generators, communication systems must rely on emergency power. Spark transmitters could easily be rigged to run on primitive backup battery banks or a hand-cranked dynamo, allowing a stranded crew to continue sending distress signals long after the ship went dark.

Maritime safety organizations recognized that in a disaster, absolute reliability trumped signal clarity. The spark transmitter served as the ultimate fail-safe. It was only in 1966, as highly reliable, ruggedized solid-state electronics and automatic emergency beacons became widely adopted, that maritime regulators finally phased out the spark transmitter, closing the final chapter on the pioneer era of radio.

OARC More Contributions

I ran across this ham radio lookalike plate. If you change the ones to (i)s it would work. Might even be a fun one for an IT guy.

Tnx Kent Gardner WA7AHY

This ham reached 700,000 QSO's on 30 Jan 2024.
His total in 2025 was 74,855 in 2025

REPEATER UPDATE

On May 6th, during a nice spring lightening storm, the Mt Ogden repeaters went down. We assumed a power outage of some kind occurred. On Monday, May 9th, we found out that we were not the only ones without power at the site. The site took a direct lightening hit during the storm and it took out some of the site lightening protection system. Someone with more money than us took a helicopter up to the site on Monday and reset the power. The repeaters came back on. And, the 146.90 repeater is no longer locked in digital mode, but can be used in normal FM again.

But, it appears that all is not quite perfect. The 146.90 repeater seems to be lacking in receive sensitivity now. It works, but it will take a little more power to get into it than before. We will not be able to get up to the site and determine what the problem is until the snow is gone, which is usually July. It could be the receive antenna (it has separate receive and transmit antennas), which is on top of one of the towers. It could be a damaged polyphaser surge protector in the coax line. It could be a damaged radio (we hope it is not this one). We suspect one of the first two. The 448.600 seems to be fine however.

CLUB REPEATER NEWS

OARC MEMBERSHIP DRIVE

SUPPORT YOUR RADIO CLUB

Don't forget to signup/renew your OARC membership. Licensed (\$15), non-licensed (\$10). Consider signing up your spouse as well.

Memberships run August to July. Remember ... FREE Steak at Steak Fry for ALL members.

THANK YOU FOR YOUR SUPPORT

Join OARC

Join or Renew your membership now!

Joining & Renewal is easy. On the club website home page click Join/Renew tab and fill out the membership form. You can pay using your PayPal or mail a Check or Money Order to the club PO Box listed. Or print a hardcopy of the membership form, fill it out and mail it to the PO Box along with your payment. Better yet, Come to a club meeting and bring the completed membership form with you.

DUES: Dues are \$15.00 per year (licensed), \$10 non-licensed. Memberships run August - July.

NOTE: New Hams >>> Membership in OARC is complimentary for remainder of 1st year licensed.

Membership in the Ogden Amateur Radio Club is open to anyone interested in Amateur Radio. You do not need an amateur license to join us. You do not need to join the club to participate with us. Dues are used to operate the club, field day activities, and repeater equipment maintenance.

OARC ARRL MEMBERSHIP DRIVE

WHY JOIN ARRL ?

**Join ARRL through OARC and receive a
free one-year membership upgrade in OARC**

Please consider that you may want to becoming a member of ARRL if you are not currently or have not been for at least two years ...

The Amateur Radio Relay League [ARRL](#) is the national membership association for Amateur Radio operators. ARRL membership includes digital access to “QST” magazine and “On The Air” magazine. Optionally you can sign up for hardcopy subscriptions to the magazines.

OARC is an affiliated ARRL club and has been since 1937. However, to maintain OARC’s affiliation, OARC must maintain that over 50% of our members are also members of ARRL.

Fill out the “joining ARRL through OARC” form, and bring/send it to OARC.

(Check OARC website for actual form)

Club Badges

OARC Club badges are available for all licensed club members.

The cost is **\$25.00** each. The badge comes with a “MAGNETIC” clip. Badge includes your Call Sign in large letters and your First Name in a somewhat smaller font in white lettering on a pitch black background with the club logo. See example below.

Place your order along with **\$25.00** prepaid in advance for each badge ordered and specify Call Sign and First Name.

Visit the club website home page Join/Renew tab and select the Badge Order form to order your badge. You can use PayPal or mail your check to the club PO Box.
